

Preliminary Consumption Information

November 2018

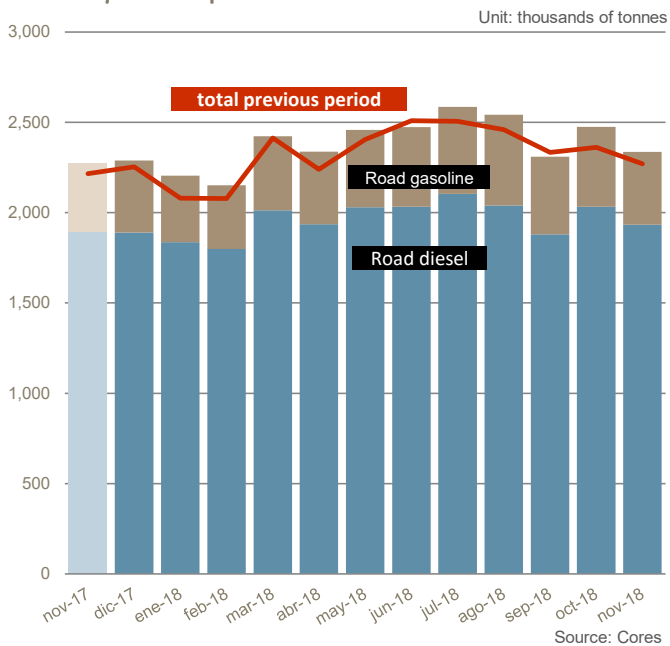

Conventional natural gas consumption (25,925 GWh) reached its maximum for a month of november since available data (2004)

Road fuel consumption rose again in November (+2.8% vs. November 2017); both road diesel (+2.1%) as well as gasolines (+6.8%) ascended. In the year to date road fuel consumption increased by 2.5%, having been greater in gasolines (+4.6%) than in road diesel (+2.1%).

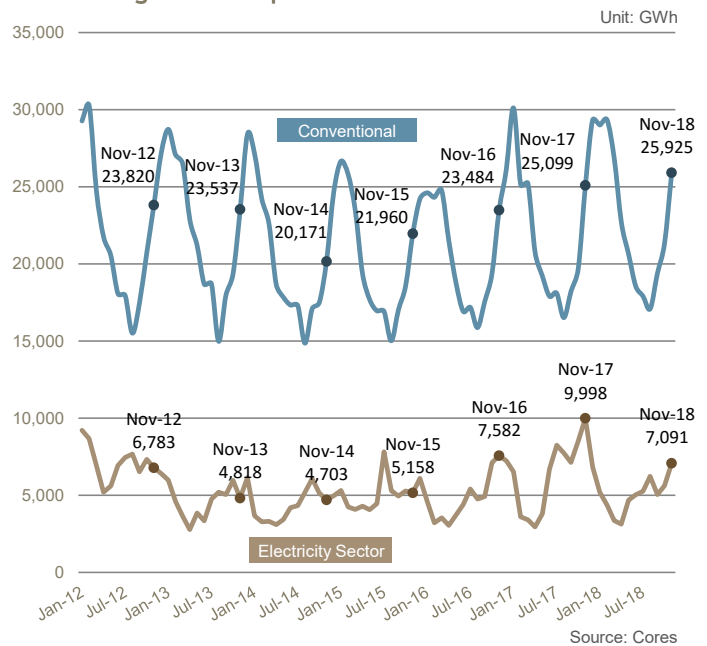

This month every petroleum product group rose, except for gasoil (-0.6%): LPG (+92.4%), gasolines (+6.8%), kerosene (+6.9%) and fuel oil (+2.3%). In the year to date all petroleum products groups presented increments: LPG (+15.0%), gasolines (+4.6%), kerosene (+4.7%) gasoil (+2.4%) and fuel oil (+2.6%).

For the sixth consecutive month, natural gas consumption diminished in November (-5.6% vs. November 2017). Conventional consumption stood out (+3.3%), which reached 25,925 GWh, the maximum for a month of November since available data (2004). However, the one intended for electricity generation (-29.1%) continued presenting strong decreases and direct consumption LNG increased by 8.6%. In the year to date, natural gas consumption decreased by 0.2%. Conventional consumption (+5.4%) and direct consumption LNG (+1.3%) rose, whilst the one intended for electricity generation (-19.8%) diminished.
