

Preliminary Consumption Information

January 2015

In January, continuing the 2014 tendency, road fuel consumption increases (+2.6% vs. January 2014)

January registers the best data for a month of January of road fuel consumption since 2012, rising 2.6% compared to January 2014. Gas oil (+2.9%) as well as gasoline (+1.4%) consumption increase.

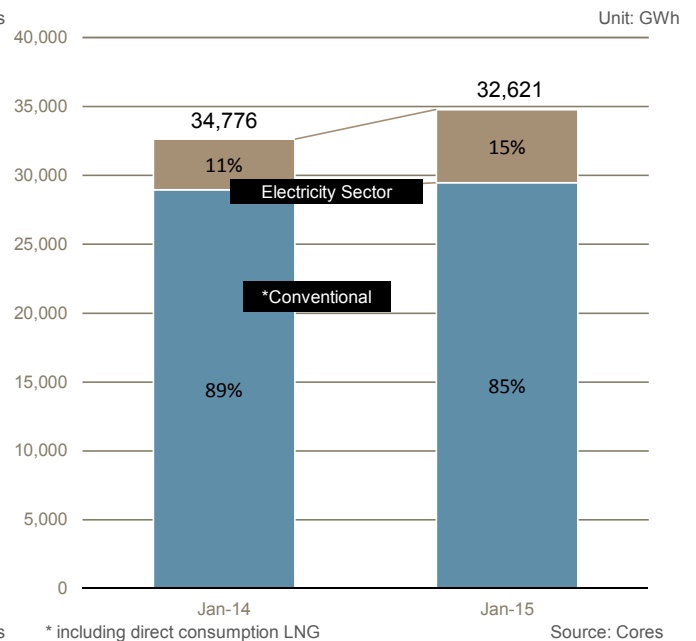

Equally, all product groups' consumption grows, except that of LPG (-0.3%) and fuel oil (-6.5%), although this increment is uneven for the different groups. Thus, kerosene and gasoline consumption rises 5.2% and 1.4%, respectively, and the sum for all types of gas oil grows 8.9%.

After the slump in natural gas consumption registered in 2014, in January consumption grows 6.6% vs. January 2014, standing out the rise in power generation natural gas consumption by 44.7%, whilst conventional use consumption increases 2.8%. However, LNG direct consumption decreases 24.5%.
